

Wrocław, 24 august 2018r.

TO WHOM IT MAY CONCERN

We herewith confirming the use of the realtime, vehicle tracking device called TE-VOGS, provided by Aero4TE.

The product is in use from 01.02.2018 until now on six in total airport side vehicles, as well as on the Airport Fire Fighter trucks.

The company Aero4TE a.s. provided a trial period for the airport operations in field test, conducted two on site staff trainings and certification. The local representative serves as our focus point for further after warranty needs.

We are recommending herewith this product to other airport authorities, in order to gain full and at all time vehicle activity control. With the implementation of TE-VOGS we have significantly received an overall coordination tool, not limited to airport side trucks.

Yours faithfully,
